AUTHOR INDEX TO 1990

Bai Dingrong see Bi Siaotao **223**

Bi Siaotao

—— Bai Dingrong; Jin Yong; Yu Zhiqing

The radial distribution of heat transfer coefficient in fast fluidized bed **223**

Brown, Donal E. see Su Zhiguo **143**

Cai Ping

—— Chen Shapeng; Jin Yong; Yu Zhiqing; Wang Zhanwen

Effect of operating temperature and pressure on the transition from bubbing to turbulent fluidzation **122**

Chang, Chien-Hou

—— Yuan Jitang

A new equation correlating liquid diffusion with concentration and experimental investigation **68**

see Ma Peisheng

—— Liu Hongqin

A new correlation of liquid viscosity with temperature

Chang Kun Soo see MaGaoyu **33**

Chao Shoubai

—— Fan Zheng

Dynamic behaviour of liquid dispersion in a vibrating plate tank **79**

Chen Jiayong see Zhao Gonghui **16**

Chen Jinwen see Chen Yuzhong **160**

Chen Liqin

—— Pan Zaoqi

Residence time distribution in a screw extruder **153**

Chen Minghen see Zhang Yong **104**

Chen Shapeng see Cai Ping **122**

Chen Yuzhong

—— Chen Jinwen; Wang Jinbo

Estimation of fixed bed heat transfer parameters wth orthogonal collocation **160**

Dai Gance see Zhang Yong **104**

Ding Tongfu

—— Sentoro Ozawa; Yoshisada Ogino

Adsorption equilibria of gases on H-mordenite under high pressure **255**

Fan Xijun

—— Tan Shiren; Fan Yurun; Wu Jia

Numerical investigation of dumbbell molecular models for polymeric solutions **90**

Fan Yurun see Fan Xijun **90**

Fan Zheng see Chao Shoubi **79**

Fu Jufu see Wang Zihao **242**

Gu Zhongmao

Electrostatic pseudo liquid membrane separation technology **44**

Guo Changxu see Ouyang Fan **206**

Guo Tianmin see Huang Hai **1**

Hou Yufen see Li Zhuoshu **174**

Huang Hai

—— Xu Donghai; Gao Tianmin

The calculation of critical properties of mixtures from equation of state **1**

Huang Hongding

—— Liu Guowei; Sun Ai

Swirl-Flow internal thermosyphon boiling device **56**

Jin Yong see Cai Ping **122**; see Bi Siatao **223**

Kwauk Moosoon see Ouyanfg Fan **206**

Li Shouchun see Xu Xien **133**

Li Yourun

—— R. L. Motard

Computer aided optimal heat exchanger network synthesis by a two-stage method **25**

Li Zhuoshu

—— Hu Jianzhen; Hou Yufen **174**

Studies on cyanation of *o*-halogenated azo dyes (I) Identification of products of the cyanation

Li Zuohu see Zhao Gonghui **16**

Liu Guowei see Huang Hongding **56**

Liu Haiqin see Zhang Jianhuo **276**

Ma Guoyu

—— Kun Soo Chang

A method of Green′ s function for the unsteady state solution of a dispersion type tubular reactor model with an immobile zone **33**

Ma Haihong see Xu Xien **133**

Ma Peisheng

—— Xu Ming; Xu Wen; Chang, Chien-Hou

New group-contribution correlation for estimation of critical properties **235**

Motard R. L. see Li Yourun **25**

Ogino, Yoshisada see Ding Tongfu **255**

Ouyang Fan

—— Guo Changxu; Kwauk Moosoon Wu Yuanxiang

Fluidization under external forces (I) Magnetized fluidization **206**

Ozawa, Sentaro see Ding Tongfu **267**

Pan Zaoqi see Chen Liqin **153**

Su Zhiguo

—— Brown, Donal E.

Cross-flow filtration of suspension with riversed-flow cleaning **143**

Sun Ai see Huang Hongding **56**

Tan Shiren see Fan Xijun **90**

Wang Booguo see Xu Xien **133**

Wang Jinbo see Chen Yuzhong

Wang Ronhua

—— Williamson, J.

Phase equilibria studies in the system $CaSO_4$-$PbSO_4$ **187**

Wang Shuying see Zhang Zeting

Wang Zhanwen see Cai Pong **122**

Wang Zihao

—— Fu Jufu

The swelling behavior of (W/O)/W liquid surfactant membrane (I) Adsorption of surfactant at the interface and the swelling caused by emulsification (II) Modeling of the permeaton swelling process **255**

Williamson, J. see Wang Ronhua **187**

Wu Jia see Fan Xijiun **90**

Wu Yuanxing see Ouyang Fan **206**

Xu Donghai see Huang Hai **1**

Xu Ming see Ma Peisheng **235**

Xu Wen see Ma Peisheng **235**

Xu Xien

—— Li Shouchun; Ma Haihong; Wang Baoguo

Simulation of thermally-coupled distribution processes with two liquid phase **133**

Yu Guocong see Zhang Zeting **112**

Yu Zhiqing see Cai Ping **122**, see Bi Shaotao **223**

Yuan Jitang see Chien-Hou Chang **68**

Zhang Yong

—— Dai Gance; Chen Minghen

Flow regime transition in gas-liquid jet-pump reactor **104**

Zhang Zeting

—— Yu Guocong

Effect of operating tempetature and pressure on the transition from bubbling to turbulent fluidization **122**

—— Wang Shuying; Yu Guocong

A new mathematical model for mass transfer in a packed column **187**

Zhao Gonghui

—— Li Zuohu; Chen Jiayong

Monte Carlo model of backmixing and reaction of particles in continuous flow system **16**
